

BIOCLEAN™

A Parts
Cleaning
System
Designed
With Future
Generations
In Mind.

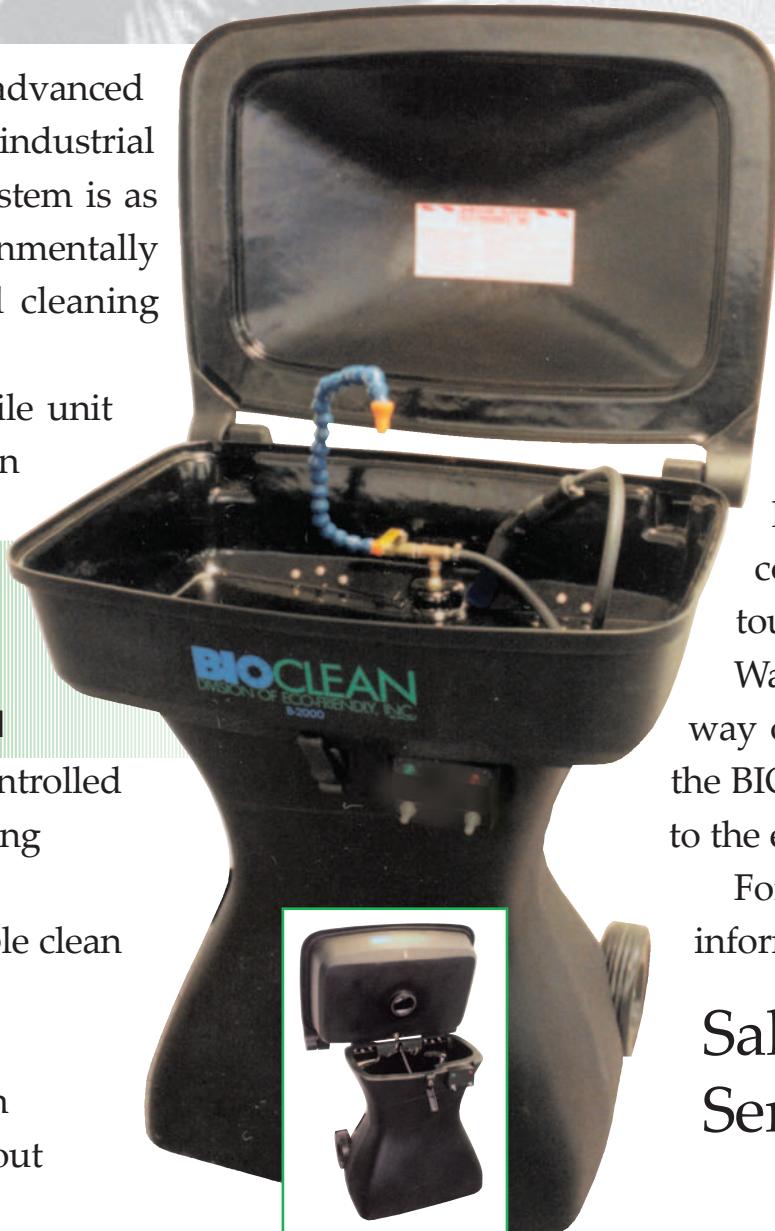

Non-Caustic. Biodegradable. Non-Flammable. Free of Toxins. Better products today for a safer world tomorrow.

BIOCLEAN™ B2000 is the most advanced parts cleaning system available for industrial applications. No other cleaning system is as affordable, convenient or environmentally safe as this parts degreasing and cleaning station.

The B2000 is a sturdy and mobile unit that does not compromise on features such as:

- \$** • Low level fluid sensor
- Automatic fluid cutoff
- Heat sensing fusible link
- ✓** • All internal wiring is GFI protected
- Energy-efficient, thermostat controlled heater for more effective cleaning
- Oversized sink for large parts
- Hinged sink tips back for simple clean out and filter changes
- Lighted easy access controls
- Mobile and safe in any location because you are cleaning without solvents

BIOCLEAN™ mobility, safety and comfort allows this parts washer to go where the work is on its 8" diameter wheels and it can be used safely in any location.

The parts washer's big 10 to 20 gallon reservoir, efficient electric circulation, thermostatically controlled heater, and rugged, rust-free Marlex construction stand up to your toughest conditions.

Water-based cleaning is becoming a way of life for industrial America. Make the BIOCLEAN™ B2000 your commitment to the environment.
